

THE ROCK.

The Rock is developed based on demand from the construction sector: a **ROCK-SOLID** power distribution unit that remains **stable** on rough terrain and withstands intensive use and that can handle current value up to **63A**. The enclosure is manufactured from polyethylene, ensuring a durable and **robust** construction, while offering a more cost-effective alternative to the rubber version. And it's not just interesting for construction – **THE ROCK** is widely applicable across a variety of sectors.

Stackable: efficient and space-saving during transport and storage.

Integrated handle in lid and lightweight: easy to handle.

- LxWxH: 400 x 400 x 580 mm
- Approx. 11 kg
- IP54

- very robust and stable construction
- stackable
- lightweight
- recyclable polyethylene in one-piece
- heavy-duty performance
- integrated handle in lid
- up to 63A
- impact resistant
- screwed from above (= easy to inspect/maintain)
- extensive configuration options

Solid like a rock. Built to perform.

BOXY

The Boxy: a **very competitively priced new model**. It's a very compact, lightweight and strong model, that is easy to handle and versatile.

- very compact
- lightweight, yet strong design
- stackable
- impact resistant
- recyclable, one-piece polyethylene
- up to 32A
- integrated handles
- 4 standardized models

Stackable: efficient and space-saving during transport and storage.

Integrated handle in the housing: easy to handle!

Lean. Mean. Built for the job.

NEW

Our new entry-level model is accessibly priced with the trusted Vello-quality.

- LxWxH: 224 x 246 x 176mm
- Approx. 3,5 kg
- IP44
